

April 6, 2021

Dear high school families,

As you know, the safety of our students and staff is our top priority, never more so than during the COVID-19 pandemic. That is why the School District of Lancaster continues to work closely with Penn Medicine Lancaster General Health and Vaccinate Lancaster.

We are writing today to share an important vaccination opportunity for your family.

Currently, the vaccine developed by Pfizer is approved for use among teenagers ages 16 to 18. The Vaccinate Lancaster clinic at Park City *currently **has** vaccine appointments available for young people in this age group.* We strongly encourage you to consider registering your child(ren) for vaccination. There is **no charge** to your family. Please register at the link below to secure a vaccination appointment:

[VaccinateLancaster.org](https://www.vaccinate Lancaster.org)

A COVID-19 vaccine is not required for school attendance; however, the sooner all our community is vaccinated, the sooner we can return to onsite instruction for all students and enjoy activities like prom and commencement—safely. We strongly encourage you to consider this choice for your family's health.

We appreciate your ongoing support.

Sincerely,

Damaris Rau, Ed.D.
Superintendent of Schools
School District of Lancaster

Pia B. Fenimore, MD
Chief, Division of General Pediatrics, Lancaster General Hospital
Lancaster Pediatric Associates
